

ZEAL PACKAGING SOLUTIONS LTD

PACKAGING SOLUTIONS CONSULTANTS

We serve with zeal

Packing, Sealing Machines, FFS Machines, Shrink Tunnels, Liquid Filling Lines, Vacuum Packing Lines, Inkjet Printer Systems, Double Sided Tapes, POF Film, Teflon Cloth, SS Wire Mesh, Filter Paper, Vacuum Pouch, Milk Processing Machine, Thread for Tea bags, Thread cones for sewing machines, Aquabond 7035 & Stencil ink block etc

Location

Along Eastern by Pass, Off Canaan Road, Blessed House Behind Alpha Business Park (Cold Storage) Phone: Whatsapp / Mobile 0729 886 690 Tel: 0786 557 441 E-mail: info@zealpackltd.com Website: <http://www.zealpackltd.com>

Our History

ZEAL PACKAGING SOLUTIONS LIMITED is a private company limited by shares and incorporated in the republic of Kenya. We are innovative ambitious high tech enterprise eager to listen and give technical advice to our potential customers.

We represent manufacturers who have exhibited high standards in quality machines for different purposes eg. Beverage packaging machines, Meat processing and packaging machines, bakery processing and bakery packaging machines, dairy machines, water purification systems and water packaging machines, continuous sealer, impulse sealer, liquid and paste filling machines, carton sealers, strapping machines, TIJ hand held coding machines, shrink wrapping machines etc.

We have highly experienced and professional team, who ensures the machines taken from us are of the highly quality standard to serve you and give you the value for your money.

Our manufacturer's are world class winners in quality.

We provide state of ART packaging solutions for E. Africa. **ZEAL PACKAGING SOLUTIONS LTD** boasts of excellent after sales service. We are reachable, accessible and reliable.

All our machines come with spare kit.

Company Vision:

Our vision is to be one of the leading solution finders in packaging industry. You can depend on us for advise and sourcing of packaging issues irrespective of the size of your business.

Company Mission:

To help business adapt a cost effective, affordable, hygienic and safe packaging solution and in tern develop the economy for us all.

Core Values:

Integrity.

Being trustworthy and aspiring to do the best. Striving to deliver on our commitment to the highest standard.

Respect.

We endeavour to promote a mutual understanding and adhere to the customer's expectation and promise to deliver our part of bargain to the customer.

Entrepreneurial spirit:

Team.

Unity in achieving the organisation objective is our cornerstone. Our members of staff are bound in a chain to deliver the best to our customers, through timely delivery of quality machines or attending to after sales service cases.

Innovation.

Novelty and the desire to remain relevant to the ever changing market environment.

Responsibility.

We take charge and remain committed to ensuring that our client's concern or queries and worries are part of our service delivery.

Series combined type vertical packing machine is suit to pack anomalous solid and the granule material, such as: puff snack food, potato chips, crispy rice, jelly, candy, apple chips, dumpling, small cookie, dry fruit, melon seeds, roasted seeds and nuts, medical material, deep-frozen food, etc. It can automatically complete following work: material lifting - weigher measuring - coding - bag making - filling - gas injection / exhaust (optional) sealing - counting - conveying finished products etc.

VERTICAL GRANULES FORM, FILLING AND PACKAGING MACHINE

Series Granule packing machine is designed and manufactured by advanced science and technology. It has reliable quality, high efficiency and elegant shape. In regards to its automatic control system, we have adopted advanced photo electric track planet differential compensating mode and automatic constant temperature control mechanism, which makes our machine to have very fast packaging speed. Moreover, our machine can carry out step less speed adjustment, and automatically finish the bag.

It can be used for various compound packaging materials.

SMALL VERTICAL GRANULES FORM, FILLING AND SEALING PACKAGING MACHINE

Powder Packing Machine is designed and manufactured by advanced science and technology. It has reliable quality, high efficiency and beautiful shape. As regards its automatic control system, we have adopted advance photo electricity track planet differential compensating model and automatic constant temperature control mechanism, which makes our machine has very fast packing speed. Moreover, our machine can carry out steps less speed adjustment, and automatically finish the processes of bag making, computation, filling, sealing, cutting, counting and printing number on the bag. Powder packing machine is widely used in the field of medication, food, chemical industry etc.

VERTICAL POWDER FORM, FILLING AND SEALING PACKAGING MACHINE

Automatically measuring volume, making bags, filling, sealing, cutting, printing the lot number and cutting easy tearing notch.

VERTICAL LIQUID FORM FILLING & SEALING PACKING MACHINE

It is suitable for double bag packing of small granular products, such as tea leaves, medicinal tea.

TEA BAG STRING & ENVELOP MACHINE

It is suitable for all kinds of regular products, like biscuit, pies, chocolates, bread, instant noodles moon cakes, paper boxes, plates and so on.

FLOW WRAPPING MACHINE

Water filling

Automatic Rotary Pet Bottle Pure mineral Water Filling Machine combines bottle washing, filling and capping in one machine, It is advanced commercial uses of pure water filling production line, which is designed and developed based on European standard to have technology with complete CIP cleaning function. The production line is suitable for water filling in room temperature.

WATER FILLING LINE WASH, FILLING, CAPPING, LABELLING & WRAPPING MACHINE

This filling line specifically for 5 gallons barreled drinking water, those types (barrels/hour), It integrates bottle washer, filler and sealer into one unit. In order to achieve the purpose of multiple injections of washing and sterilizing by means of liquid washing and bleaching are used in bottle washer, washing solution can be used circularly. The sealer can seal barrel caps automatically. This line equipped with water spraying device to sterilize caps of bottles in order to ensure those caps are aseptic and hygiene. Also this line can automatically carry out barrel feeding, washing, sterilizing, filling, capping counting and products discharging. It is a new kind of barreled water auto-producing line. Which integrates mechanism, electricity and pneumatics technology together.

5 GALLON WASH, FILLING & CAPPING MACHINE

3 in 1 Glass Bottle Beer Filling Machine.

The machine for glass bottle integrates the function of rinsing, filling and capping together. Based on advanced technology and designed according to filling processing demands of beer. This beer filling machine is suitable for beer product, it consists of filler plastic or aluminum lid sealer and sometimes people also use one stage washer.

ALCOHOLIC FILLING LINE WASH FILLING & CAPPING MACHINE

WATER PURIFICATION PLANT REVERSE OSMOSIS

Applied in water purification process.

The servo motor is adopted to drive the molding mechanism, triggering off a bottom mold linkage as well. The whole mechanism works speedy, accurately, stable and flexibly. Meanwhile, it is energy efficient and environmental safe. Oil or electricity heated, the mold can ensure bottles meet the hot filling requirement and withstand a temperature up to 90 ~ 95°C without deformation. The capacity of each cavity can be up to 700~900bph. The servo motor driven stepping unit and stretching mechanism have improved the speed, flexibility and accuracy of blowing. The simple slide-in way of mold mounting makes it possible for the operators to change molds easily within 30 minutes. Occupies a smaller area. The series is applied widely in PET hot filling bottle for juice, tea drinks, energy drinks and other hot filling drinks.

AUTOMATIC BLOW MOULDING MACHINE

The machine can label the single-side of round bottle, dual-side and tri-side of square bottle. Single-side and dual-side of flat bottle. The machine is suitable in such industries as food, medicine, wine, oil and cosmetics.

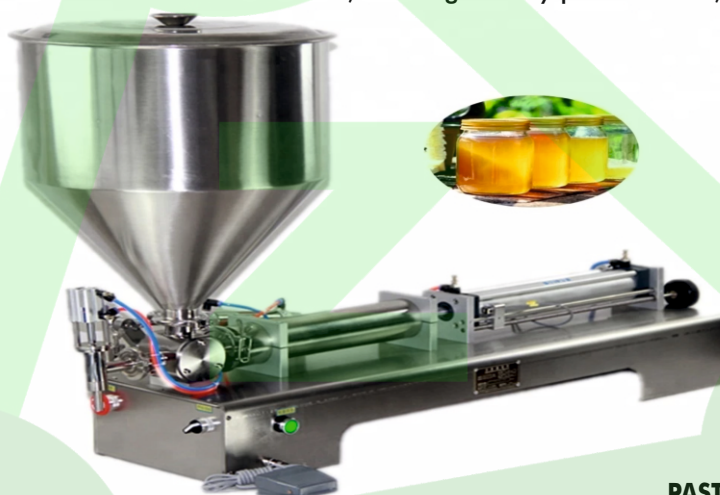

LABELLING MACHINE

This series of liquid filling machine applicable for food, oil, medicine, pesticides industry and so on, filling different types of liquid products. It uses a straight line piston filler filling with high precision. It is easy to install cleaning, maintaining and has non-drip system among other advantages.

OIL FILLING MACHINE

Series semi-automatic liquid filling machine with reasonable structure, compact model, high performance, quantitative accuracy & easy to operate. The power part adopts pneumatic structure components from Germany FESTO. It can be arbitrary adjusted according to the customer needs within the filling volume and filling speed. The filling head adopt anti-drip and lifting filling device. That uses compressed air control drive, therefore particularly suitable for use in explosion proof requirements and humid environment, with high safety performance, stability and characteristics.

PASTE FILLING MACHINE

The Pasteurizer adapts food grade 304 stainless steel, Good pasteurizer effect, low noise & simple operation. There is a jacket between the inner layer and outer layer for the cooling and heating tank.

MILK BATCH PASTEURISER MACHINE

Applicable in milk treatment through heating homogenization and chilling.

MILK CONTINUOUS PASTEURISER MACHINE

Plate pasteurizer is used for processing milk then go to fermentation and do cheese, yogurt etc., this is a necessary process for cheese work. It connects with separator, homogenizer, flash evaporator and degasser etc equipment.

MILK UHT-ASEPTIC-FILLING-MACHINE

Milk cooling tank is mainly composed of the body, agitator, cooling unit and electric control cabinet. The milk cooling tank body is made of stainless steel, with precision resistance. Out side the inner layer of the milk cooling tank is a kind of jacket as the picture below. This kind of deep jacket will send the coolant to all part of the tank cooling milk in shortest time. Out side this deep jacket, there is a layer of heat preservation. This insulation layer will help to keep the milk in low temperature.

MILK COOLING TANK

ROTARY YOGURT FILLING MACHINE

Automatically fills a preset volume and seals the containers with pre-cut aluminium foils. Has variable speed and variable volumes.

Pack sausages {cooked or fresh} at variable speeds. Has optional cording and or vacuum process.

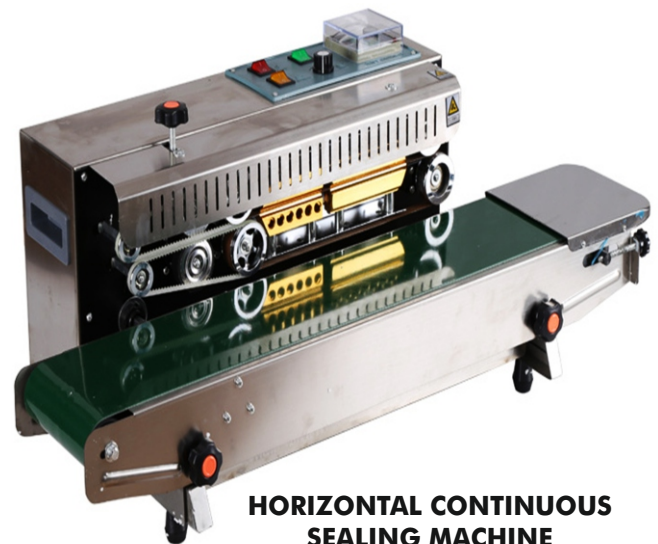

AUTOMATIC THERMOFORMING GAS FLUSHING PACKAGING MACHINE

This sealing machine has the function of continuous carry, seal and print in one operation. It can be vertical or horizontal. The machine adapts electronic constants temperature and speed controller.

**VERTICAL CONTINUOUS
SEALING MACHINE**

**HORIZONTAL CONTINUOUS
SEALING MACHINE**

This Vacuum packing machine is featured by automatic processing of vacuum, sealing, printing, cooling, which is used in vacuum packaging for the food, pharmaceutical, aquatic, chemical and electronic industries. It can prevent the products from oxidization and mildew, as corrosion and moisture, keeping the quality and freshness of the product over a prolonged time.

VACUUM PACKER MACHINE

Applied in sealing plastic / polythene or laminated materials. They are foot operated.

FOOT SEALING MACHINE

FOOT SEALING MACHINE

Applied for sealing plastic / polythene or laminated materials. Its hand operated.

HAND SEALING MACHINE

Applied in sealing the bread neck / cakes etc

NECK BAG MACHINE

**HAND WRAPPING
MACHINE FILM WRAPPER**

**MANUAL INDUCTION
SEALING MACHINE**

Semi-automatic strapping machine is mainly used in packing and binding of paper carton, wooden case and paper parcel in sectors of business, postal service, railway, and bank, food, pharmaceutical and publishing. The drive unit is equipped with a dust cover and adopts a special design, which enables silent and powerful operation. The machine also has the automatic power - off function.

SEMI AUTOMATIC STRAPPING MACHINE

This carton-sealing machine uses less energy, the frame is made by 3mm high quality steel plate, which is very strong and prevents deformation of the frame in case of long term performance and heavy usage.

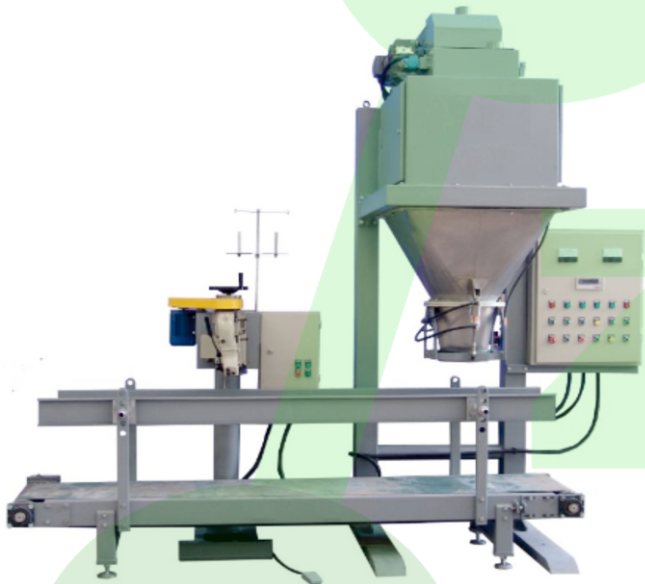

SEMI AUTOMATIC CARTON SEALER MACHINE

Portable sewing machine with single / double stitches.

PORTABLE BAG CLOSER

This machine weights, fills and sews the sack

BAG FILLING AND STITCHING / SEALING MACHINE

Coding System Ribbon date printer

Mainly used for simple printing, such as production date, expiring date and batch number.

RIBBON MIXER MACHINE

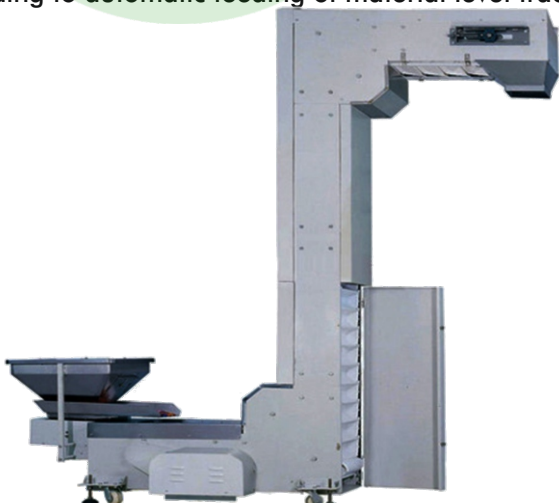

SEMI AUTOMATIC CODING MACHINE

MANUAL CODING MACHINE

ONLINE CODING MACHINE

DRY INK CODING MACHINE

It applied in vertical lifting, 90 degree transportation. It saves floor area and reduces power loss. Has advantage of adopting bucket type loading material, no scattering, matching with packing machine and multi-head weighing leading to automatic feeding of material level tracking.

Z-TYPE BUCKET ELEVATOR

Uses variable speed controlled motor, has a PVC belt. Can be used to move products, materials from one point to other.

CONVEYOR

Applicable for milk powder, rice noodle, tea, powder, starch, protein powder, seasoning and flour.

POWDER ELEVATOR (SCREW CONVEYOR)

Powder Processing Equipment mixing machine. Mainly used for evenly mixing two or more materials. eg rice, sugar, tea blending, animal feeds etc.

It is used for filling low viscosity liquids in small quantities to cans, bottles etc in semi automatic mode.

LIQUID FILLING MACHINE

Weighing small quantities of materials

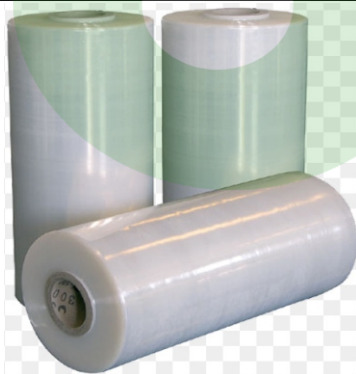

TABLETOP WEIGHING SCALE

Applicable in counting of tiny seeds.

SEED COUNTING MACHINE

SHRINK WRAP

INDUCTION WADS

STRETCH WRAP

MULTICOLOR PRINTED PACKAGING ROLLS

STENCIL INK BLOCK

FILTER PAPER

TEA BAG COTTON THREAD
